

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights with Tableau

1.2 – Purpose of the Project

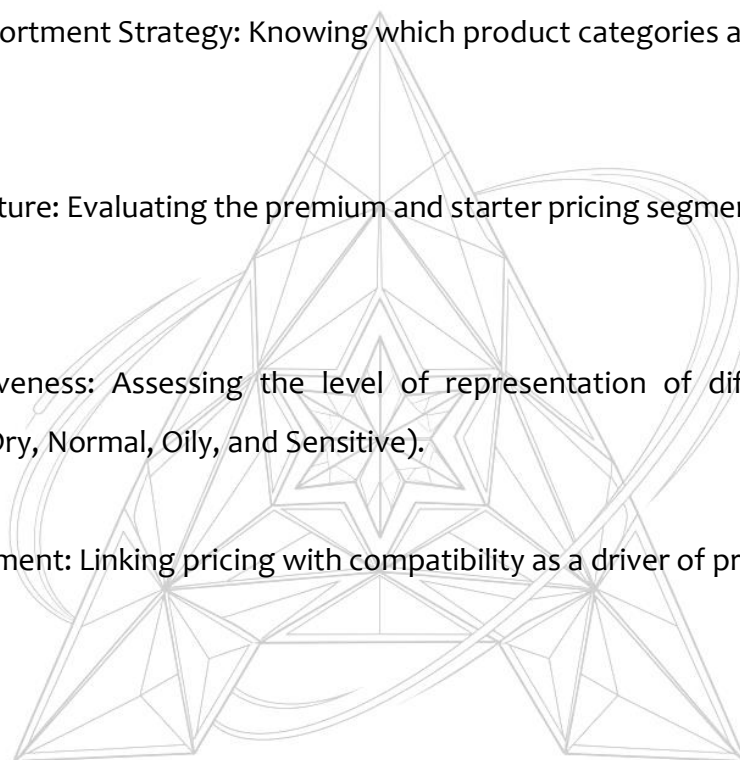

This research seeks to analyze the skincare and cosmetic industry dynamics that will enable retailers, developers, and marketers make evidence-based decisions. Analysis of the industry dynamics will be based on four pillars:

Inventory & Assortment Strategy: Knowing which product categories and brands rule the shelves.

Pricing Architecture: Evaluating the premium and starter pricing segments as well as value of the category.

Product Inclusiveness: Assessing the level of representation of different skin types (Combination, Dry, Normal, Oily, and Sensitive).

Customer Sentiment: Linking pricing with compatibility as a driver of product rankings.
