

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights With Tableau

TEAM ID	SWTID-2026-8806
PROJECT TITLE	COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights With Tableau
MAX MARKS	5 MARKS

CHAPTER – IV PROJECT DESIGN

4.1 – Problem Solution Fit

The Problems you find in the cosmetic industry include rapidly changing trends in beauty, large amounts of data about customers and products, identifying consumer trends, determining the performance of brands, determining how to price goods, and being competitive in the market by determining new opportunities. Businesses that fail to properly analyze their data may miss opportunities to be competitive in their industry.

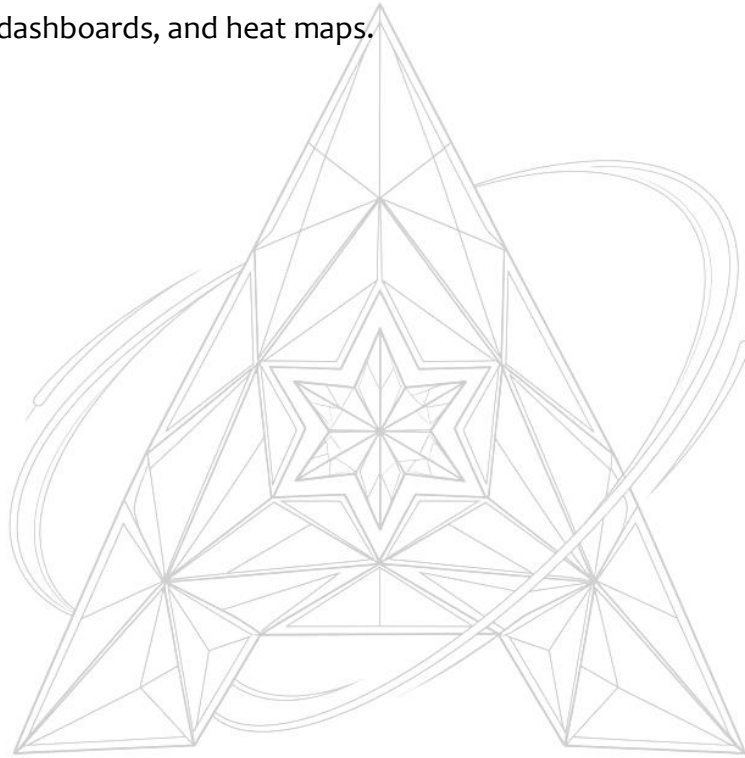

To solve this problem, we will use Tableau to collect, process, analyze and visualize data from the cosmetics industry. The following four stages will be completed:

- Data Collection - Collecting products, sales, customers, social media, and demographic data.
- Data Processing - Cleaning the data by removing duplicates, handling missing values, and organizing datasets using Python, Pandas, and NumPy.
- Data Analysis - Analyzing revenue, product categories, customer behavior, brand performance, and market trends using Tableau.

By using Tableau, we will create interactive dashboards to provide business insights, including:

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights With Tableau

- Interactive Dashboards - View sales, revenue, and brand comparisons.
- Filtering & Drill Down Analysis - Filter by product category, brand, price, age, and skin type.
- Trend Analysis - Identify seasonal demands, top-selling products, and market growth.
- Data Visualization - Provide a clear understanding of data by using bar graphs, pie charts, trend lines, KPI dashboards, and heat maps.
