

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights with Tableau

TEAM ID	SWTID-2026-8806
PROJECT TITLE	COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights with Tableau
MAX MARKS	1 MARK

CHAPTER – V

PROJECT PLANNING AND SCHEDULING

5.1 – Project Milestones & Tasks

Milestone 1: Project Planning & Requirement Analysis

Goal: Define the scope, objectives, & business requirements of the project.

Tasks: Define project objectives & expected outcomes, identify challenges faced by the cosmetics industry as well as their needs from a business perspective. Define key performance indicators (KPIs) for the analysis. Select tools & technologies to be used (Examples: Python, Tableau). Create a workflow/architecture for the project.

Milestone 2: Data Collection

Goal: Collect the data needed to conduct analysis of the cosmetics industry.

Tasks: Collect datasets related to cosmetic products via online sources. Collect details about each product such as brand name/category/price/rank/skin type. Collect customer review & feedback datasets. Collect sales & revenue data. Collate datasets from online retail/e-commerce as well as from the market.

Milestone 3: Data Cleaning & Data Preprocessing

Goal: Prepare a clean & structured dataset for the purpose of analysis.

Tasks: Eliminate duplicate records. Address any missing or incomplete values.

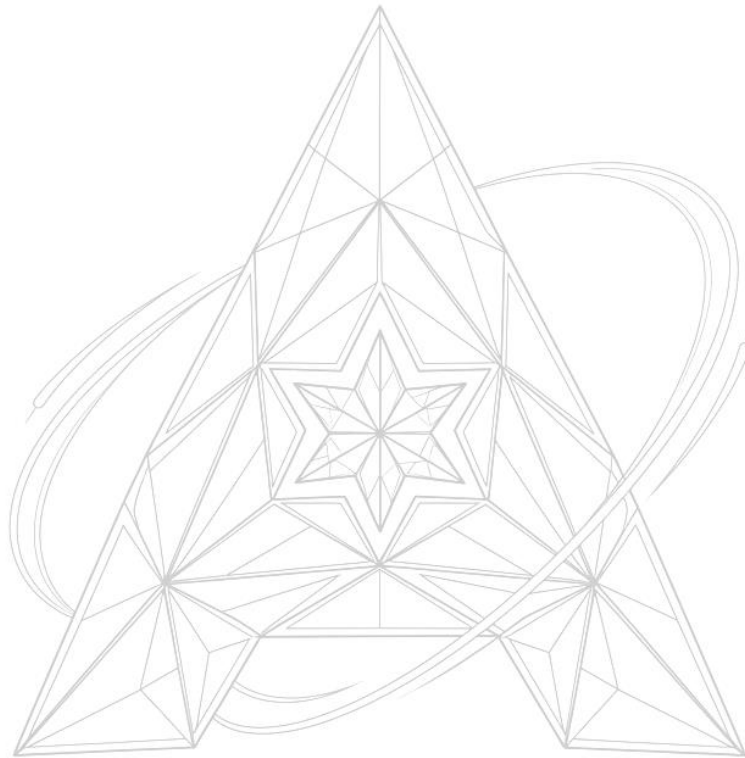

Standardize pricing & categories for all products. Filter out categories for which there is no match to the skin type (Dry, Oily, Normal, Sensitive, Combination). Organize & structure data using a programming language/pandas or NumPy.

Milestone 4: Data Analysis

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights with Tableau

Goal: Conduct analysis of the performance of cosmetic products as well as consumer behaviour.

Tasks: Conduct analysis on the distribution of product categories. Conduct revenue & sales analysis on each of the product categories. Compare the performance of all of the brands in the cosmetics industry. Identify pricing patterns of products sold by the brands. Identify the preferences of consumers based on their purchase of cosmetic products.
