

COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights With Tableau

TEAM ID	SWTID-2026-8806
PROJECT TITLE	COSMETIC INSIGHTS: Navigating Cosmetics Trends and Consumer Insights With Tableau
MAX MARKS	1 MARKS

5.3 – Project Progress Tracking

Project Duration

The project lasted for 11 days.

Day	Activity	Status	Deliverable
Day 1	Imported and validated the dataset	Completed	Cosmetics dataset successfully loaded into Tableau
Day 2	Cleaned and prepared the data	Completed	Dataset cleaned and validated
Day 3	Created filters for Category, Brand, and Skin Type	Completed	Interactive filters configured
Day 4	Created calculated fields	Completed	All Skin Types Count metric created
Day 5	Analyzed product distribution	Completed	Category-wise product distribution charts developed
Day 6	Performed revenue and pricing analysis	Completed	Category revenue and average price visualizations created
Day 7	Analyzed brand performance	Completed	Top 10 brands by skin type coverage and product count identified
Day's 8,9	Analyzed skin type distribution	Completed	Combination skin and cosmetic count analysis completed
Day's 10,11	Developed the dashboard	Completed	Integrated Tableau dashboard created
Day 12	Added dashboard actions and filter integration	Completed	Dynamic dashboard interactions enabled
Day 13	Added story actions and filter integration	Completed	Dynamic dashboard interactions enabled
Day 14	Tested, validated, and reviewed the dashboard	Completed	Final dashboard delivered successfully

Key Analyses Completed

- 1. I looked at product distribution across categories**
- 2. I did a category- revenue analysis**
- 3. I found the 10 brands for multiple skin types**
- 4. I identified the 10 brands by product count**
- 5. I compared prices across brands**
- 6. I analyzed combination skin product distribution**
- 7. I did a brand- cosmetic count analysis**

Business Scenarios Addressed

Scenario 1: Consumer Preference Monitoring

I can track category popularity and product distribution with the cosmetics dataset.

I can identify shifts in customer interest and purchasing trends for cosmetics.

Scenario 2: Product Concern Analysis

I can monitor product rankings and performance using the Tableau dashboard.

I can support quality assessment and brand reputation management for cosmetics companies.

Scenario 3: Insights and Product Innovation

I can analyze patterns in the cosmetics dataset for future opportunities. ✨

I can support data-driven product development and marketing strategies for cosmetics companies.

Final Outcome

I successfully developed a Tableau dashboard that provides insights into cosmetics trends, consumer preferences, pricing behavior and

brandperformance. The Tableau dashboard supports business decisions through dynamic filtering and visual analytics, for cosmetics companies.

Dataset Information

The cosmetics dataset has 1,472 rows

It has 10 columns

The size is approximately 1–2 MB

I used Tableau Desktop as the tool

Project Status

✓ The project is completed successfully
