

TEAM ID	SWTID-2026-8806
PROJECT TITLE	OSMETIC INSIGHTS: NAVIGATING COSMETICS TRENDS AND CONSUMER INSIGHTS WITH TABLEAU
MAX MARKS	3 MARKS

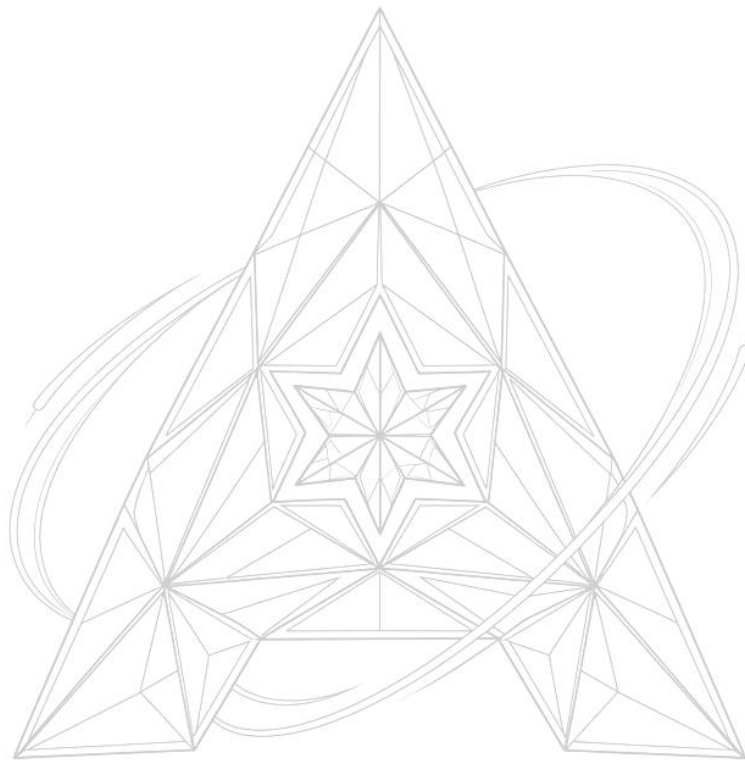

6.2 – Data Connectivity

1. Opening Tableau
2. First, we will open Tableau and get the start page.
3. Finding the "Sample Workbooks" Section
4. Under Connect and Sample Workbooks sections, options will be available on the left side panel.
5. Pre-built datasets come with Tableau, which we can use directly for visualization

6. Pick any database such as Sample - Superstore, World Indicators, etc.
7. (Depending on Tableau version, different databases might be selected)
8. Click to open → Automatically imports data into Tableau Workbook.
9. Switch to Data Source tab to check the tables, field names, and data type.
10. Rename the fields, create calculated fields or even add more data source.

11. Go to a new Worksheet.
12. Start dragging Dimension and Measure fields onto Rows, Columns, Filters, Marks, etc.
